About Me

Multidisciplinary Architect and Interior Designer with experience in luxury interiors, residential villas, and industrial facilities. Passionate about sustainable and environment-responsive design, integrating strategies inspired by biomimicry and passive principles. Skilled in creative design, client relations, and project management, delivering spaces that are both functional and aesthetically compelling. I pay special attention to the sense of ambiance and materiality, creating environments that engage the senses.

Professional Experience:

Executive Manager – Hamko, Tehran , Iran (2019-2022)

Oversaw coffee and fragrance production while leading architectural and interior design initiatives for industrial facilities.

Designed and coordinated the coffee production facility in Kermanshah, integrating functional workflows with aesthetic and sustainable design considerations.

Showroom Manager & Interior Designer – CasaViore, Tehran (2016-2019)

Managed showroom operations and coordinated interior design projects featuring luxury Italian brands including Paolo Castelli, Baxter, Antonio Lupi, Poliform, and Varenna.Led full project workflows from concept to installation, ensuring seamless collaboration with clients and international manufacturers.Successfully attracted and engaged high-end clients, generating over €100,000 in sales through personalized design solutions

Education

Master’s Degree in Architectural Composition, University of Genoa, Italy –

Graduated 2025 July

Thesis: “Future Houses for Emirati People – A Passive Cooling Approach Inspired by Biomimicry and Persian Windcatchers”Proposed architectural strategies that reduced indoor temperature by up to 20°C without extensive air conditioning.

Bachelor’s in Architectural engineering, Payame Noor University, Tehran, Iran

Designed a Rehabilitation and Youth Development Center in Tehran, focusing on functional and safe spaces for adolescents aged 15–18.
